

**OUR ROBOTIC SURGERY PROGRAM  
LEADS THE REGION FOR GYN PROCEDURES.**

# EXPERIENCE MATTERS.

**STATE-OF-THE-ART  
ROBOTIC TECHNOLOGY  
IN EXPERT HANDS.**

From left: Mary Kilkenny, MD, obstetrician and gynecologist; Tom Margolis, MD, obstetrician and gynecologist; Albert Pisani, MD, gynecologic oncologist; Nadine Graven, MD, obstetrician and gynecologist; and Dwight Chen, MD, gynecologic oncologist.

Years ago, we dreamed that robots might simplify our lives. Today, robots are saving lives, especially in the hands of the skilled surgeons at El Camino Hospital. Our robotic surgery program is renowned for exceptional expertise and experience — particularly in gynecological procedures for women. In fact, we perform more robotic-assisted gynecological surgeries than any other program in Northern California, including minimally invasive hysterectomies and delicate procedures to treat pelvic tumors and fertility issues. Our 3D, HD robotic technology is state of the art, matched only by the talent of our extraordinary team. We work closely with a patient's referring doctor, then listen, advise, and operate with a woman's best interests in mind. So patients experience less trauma, scarring, and risk of complications. It's technology and teamwork at its finest.

**Call to schedule a priority appointment with  
one of our experts or visit our website for more information.**
